SITUATION

Brand X launched in Summer 2014. To ensure their launch was executed well, they used Buyerly to validate the “retail ready-ness” of their new line. They completed a short online form and submitted product images for a critique by a panel of big box retailers. Our buyers gave their opinions on the brand’s **packaging, pricing, and product positioning**. The panel also identified Brand X’s **key selling points** so the brand could pitch their line to retailers in a persuasive way.
